Title 20

Certification Processes

California's Appliance Efficiency Regulations

Did you know many appliances are regulated under Title 20 and must be certified to the California Energy Commission (CEC) to be sold or distributed in the state?

And that **everyone** in the sales chain - **including Manufacturers, Distributors and Retailers** - is responsible for ensuring these products are listed in the CEC Appliance Efficiency Database?

Help is Available

We are here to help you ensure your products meet the requirements of California's appliance and equipment energy code, Title 20.

We understand that being in compliance is important to your bottomline - especially with the enforcement provisions introduced in Section 1609 of Title 20 in July 2015.

Our technical experts will:

- ❖ Explain the Title 20 regulations and what compliance means for your business
- ❖ Walk you through the process to confirm your products are certified to CEC Modernized Appliance Efficiency Database System (MAEDBS)
- ❖ Provide tips on how to incorporate these processes into your regular workflow
- ❖ Provide tips for retailers to talk with manufacturers and distributors

Helpful Resources

We offer training and resources on the following topics:

- ❖ Accessing the CEC Appliance Efficiency Database
- ❖ Mechanisms for determining compliance with standards
- ❖ Best practices for retailers, manufacturers and distributors

On-Demand Video™

On-Demand Title 20 Training Now Available!

Energy Code Ace is pleased to announce the launch of its Title 20 On-Demand Video Training series

The initial launch of our Title 20 Appliance Efficiency curriculum focuses on the essentials manufacturers need to know to use the California Energy Commission's newly released Modernized Appliance Efficiency Database System (MAEDBS). Over time, we anticipate the curriculum will grow to include modules for thirdparty certifiers, test labs, retailers, distributors and consumers. We will also be developing other types of class formats, such as Traditional Classroom and Virtual Classes.

To make sure you hear about new trainings when they become available, register with EnergyCodeAce.com and select a Title 20 related role in your user profile. You'll also be notified when other Title 20 tools and resources are available!

Our first nine On-Demand Video Training Segments include:

This module is designed to orient you to the curriculum and explains how to get the most out of the interactive video modules

- About the Training

This series explains what's new with the MAEDBS and offers "hands-on" training on how to work with it to accomplish database tasks required by manufacturers.

- What's New: MAEDBS
- Registering and Managing an Account
- Documentation for Adding Appliances
- Steps to Adding Appliances
- Demonstrations of Adding Appliances
- Modifying or Deleting an Appliance

These modules provide context for the California Appliance Efficiency Regulations and give an overview of the compliance process and enforcement related issues.

- Overview and Background
- Title 20 Enforcement
