

2016 ENERGY CODE

Title 24 Part 6
Essentials

Residential Standards

Plans Examiners & Building Inspectors

FREE 2016 Energy Code Training

Now more focused on what we heard you say you need in a training:

- **More doing, less talking**
- **More how-tos, less content heavy**
- **More strategic, less overwhelming**

This new & improved course will help you:

- **Use Your Limited Time Strategically:** Identify “essential” Plans Examiner and Building Inspector review tasks associated with top energy savings, and describe how review strategy shifts based on project type (Performance vs Prescriptive; New vs ADDs/ALTs).
- **Understand What’s Crucial:** Identify residential construction’s “top five” areas of typical greatest impact on energy savings.
- **Leverage Available Resources:** Use given Plans Examiner and Building Inspector Checklists to guide review, and identify where checklist line items correspond to compliance documentation, Plan Set drawings and observed on-site conditions.
- **Develop a Flexible Review Strategy:** Use Plans Examiner and Building Inspector Checklists and task prioritization strategies to perform a plan check or building inspection that is appropriate given your available time, realities on the job and goals of Title 24, Part 6.
- **Focus on Communication:** Practice ways to address non-compliance, as well as methods for communicating effectively, during plan check and building inspection phases.
